TERMS AND CONDITIONS

TERMS OF PAYMENT. All invoices for purchases will be charged at prices quoted in this catalog unless special offers are made by letter or telegram. Our terms are 1½ % 10 days, net 60 days for customers with accounts of approved credit. New customers desiring credit must furnish us with one bank and three trade references. We also give special discounts to organizations selling our seeds.

FREE DELIVERY. The prices of all seeds quoted in this catalog are prepaid. **SHIPPING INSTRUCTIONS.** We will ship your order the way we think is best unless we are otherwise advised by you.

LIMITATION OF WARRANTY. We warrant to the extent of the purchase price, that Seeds or Bulbs sold are as described on the container, within recognized tolerances. We give no further warranty, express or implied.

All prices in this catalog are subject to change without notice and to our stocks being unsold.

ASPARAGUS SEED AND ROOTS

Plant 4 pounds of seed to the acre, about 12,000 plants to the acre

MARY WASHINGTON

	25 rts.	50 rts.	100 rts.	500 rts.	1000 rts.
Roots	\$1.30	\$2.40	\$4.00	\$12.00	\$27.50

We offer extra large one year old roots that transplant better than two year olds. The first cutting should be light in order to allow the plants to develop fully.

	1 oz.	¼ lb	1 lb
Seed	\$.40	\$1.10	\$3.00

Sow early in the spring in rows 1½ to 2 feet apart, placing the seed 1 inch apart and 1 inch deep. An ounce of seed will produce 750 roots. First cutting can be made third year.

STRING BEANS

GREEN PODDED BUSH VARIETIES

1 pound will plant 100 feet of row; 60 pounds to the acre

	1 lb	10 lb	1 bus. 60 lb
Bountiful ..	\$.55	\$4.50	\$21.00

47 days. Earliest of the Flat Podded Varieties. Pods 6 to 7 inches long, thick, flat, light green, stringless. Used for canning and freezing especially for French cut style. Seed light tan or cream colored.

Contender	\$.60	\$5.50	\$21.00
------------------------	---------------	---------------	----------------

52 days. Very early and highly productive. Resistant to Bean Mosaic and in some degree to Powdery Mildew. Pods 6 to 7 inches long, round when young, medium dark green, stringless. Seed, off white, lightly mottled with brown, large kidney shaped.

Resistant Black Valentine Asgrow Strain	\$.60	\$5.00	\$21.00
---	---------------	---------------	----------------

55 days. Plant is large, erect and prolific; bearing dark green oval pods 6½ to 7 inches long. Nearly straight, stringless. Seeds black.

Stringless Green Pod	\$.55	\$4.75	\$20.00
-----------------------------------	---------------	---------------	----------------

50 days. Plants medium large and yield extremely well under the most adverse conditions. Beans are oval, medium green, 6 inches long, slightly curved. Seed, dark coffee brown.

Tendergreen	\$.65	\$5.50	\$21.60
--------------------------	---------------	---------------	----------------

52 days. An outstanding general purpose variety. Beans 6 inches long, round, straight, stringless and of fine quality. Plant erect vigorous and very productive. Seeds mottled buff and purple.

WAX PODDED VARIETIES

	1 lb	10 lb	1 bus. 60 lb
Brittle Wax	\$.70	\$6.00	\$24.00

53 days. Plants large, erect, medium green and very productive. Pods grow 5½ to 6½ inches in length, clear, light waxy yellow in color, round, smooth and slightly curved. Flesh is tender and brittle. Seeds kidney shaped, white with irregular black marking around the eye.

Cherokee Wax	\$.70	\$6.00	\$24.00
---------------------------	---------------	---------------	----------------

50 days. Plant erect and vigorous with dark green foliage. Beans 6 to 6½ inches long, fairly straight. Golden yellow oval, and stringless. Seed, jet black.

String Beans continued next page

STRING BEANS

1 pound will plant 100 feet of row; 60 pounds to the acre

WAX PODDED VARIETIES

	1 lb	10 lb	1 bus. 60 lb
Pencil Pod	\$.60	\$5.00	\$21.00

52 days. A leading wax variety for home market, canning and freezing. Plant large, stocky, vigorous and strongly productive. Pods round, 5½ to 6 inches long, rich yellow, tender, entirely stringless and of excellent quality. Seeds oblong, slightly flattened, solid black.

Surecrop Wax	\$.60	\$5.00	\$21.00
---------------------------	---------------	---------------	----------------

53 days. Plant large, sturdy, very productive. Pods flat, 6 to 7 inches long, golden yellow, brittle, absolutely stringless and of fine quality. Bears over a long season. Good on all markets. Seeds black.

POLE BEANS

	1 lb	10 lb	1 bus. 60 lb
French Horticultural	\$.80	\$7.50	\$36.00

68 days. Our stock is a very fancy strain of New England shell Bean. Bushy plant with short runners. Pods average 8 inches in length and 5/8 inches in width, with a heavy splashing of carmine. Seeds pinkish buff, mottled and streaked with oxblood red.

Kentucky Wonder	\$.65	\$6.00	\$24.00
------------------------------	---------------	---------------	----------------

65 days. The beans are 7 to 9 inches long, nearly round, twisted and characteristically wrinkled. The most popular Green Podded Pole variety. Seed light buff brown in color.

Mammoth Fava	\$.65	\$6.00	\$24.00
---------------------------	---------------	---------------	----------------

75 days. Sometimes called Horse Bean. Pods 9 to 10 inches long, flat glossy green, containing 5 or 6 seeds. Used as a shell bean. Seeds large, circular, flat, pale reddish brown with black eye. Much hardier than most Beans. Large erect, bush plant,

LIMA BEANS

BUSH VARIETIES

1 pound plants 100 feet of row; 1 bushel, 60 pounds to the acre

	1 lb	10 lb	1 bus. 60 lb
Fordhook No. 242	\$.60	\$5.50	\$22.20

72 days. Plants large, wide spreading, prolific, with more foliage than regular Fordhook. Pods contain 3 to 4 thick oval, light green beans. This variety yields well in conditions where other thick seeded Limas fail.

Improved Bush	\$.60	\$5.50	\$22.20
----------------------------	---------------	---------------	----------------

75 days. The best of the flatseeded Bush Limas. Plants are large, erect, vigorous and very productive. Pods are 4½ to 5½ inches long and 1 to 1½ inches broad, slightly curved, containing 4 or 5 very large beans of fine quality. Good for freezing.

POLE VARIETIES

	1 lb	10 lb	1 bus. 60 lb
Giant Podded	\$.65	\$6.00	\$24.00

90 days. Beans are 5½ to 6 inches long, 1¼ inches wide with 4 or 5 extra large, oval, flat green beans. Vines grow to a height of 10 feet and produce their pods in clusters of 4 to 8 until killed by frost.

King of the Garden	\$.65	\$6.00	\$24.00
---------------------------------	---------------	---------------	----------------

88 days. The most popular and widely used Pole Lima. Vines vigorous, heavily productive and good climbers. Pods broad, straight, containing 4 to 5 beans. Seeds white, large, thick and flat. Good for freezing.

BEETS

1 ounce plants 100 feet of row; 7 pounds to the acre

	1 oz.	¼ lb	1 lb	10 lb
Astra	\$.30	\$.65	\$1.85	\$1.75
60 days. A very uniform, refined bunching beet. Tops are medium in size, a bit lighter green than Detroit. Roots are outstandingly uniform in size and shape, which is round. They are almost entirely free from any fibrous side roots. Interior is deep blood-red and indistinctly zoned.				
Detroit Dark Red	\$.20	\$.50	\$1.60	\$1.50
60 days. The standard variety for market and canning. Roots globe shaped, smooth, deep red with small tap root. Flesh dark red. Tops small, with distinct red tinge, especially noticeable in the fall.				
Detroit Short Top	\$.20	\$.50	\$1.60	\$1.50
60 days. The standard variety for market and canning. Root globe shaped, smooth, deep red with small tap root. Flesh dark red. Tops small, with distinct red tinge, especially noticeable in the fall.				
Early Wonder Green Top	\$.25	\$.55	\$1.65	\$1.55
50 days. Roots semi-globe shaped with medium dark green tops and small tap root. The skin is dark red, flesh deep blood-red with little zoning. Very popular market variety for bunching. Tops retain green color in the fall.				
Green Top Bunching	\$.25	\$.55	\$1.65	\$1.55
57 days. Medium sized, lustrous green top which holds well in shipping and helps to maintain fresh appearance. Roots similar in shape to Early Wonder but with less zoning.				

MANGEL WURZEL

1 ounce plants 50 feet of row; 7 pounds an acre

	1 oz.	¼ lb	1 lb	10 lb
Mammoth Long Red	\$.20	\$.45	\$1.35	\$1.30
110 days. Roots large, long spindle shape, straight and thick growing 1/3 to 1/2 out of the ground; color light red; flesh white tinged with rose.				

SWISS CHARD

1 ounce plants 100 feet of row; 7 pounds an acre

	1 oz.	¼ lb	1 lb	10 lb
Broad Ribbed Dark Green	\$.20	\$.60	\$1.75	\$1.55
50 days. The smooth or slightly crumpled leaves are dark glossy green; stem and midribs clear white, broad and comparatively thick. Distinct from other chards and favored by many market gardeners.				

BRUSSEL SPROUTS

1 ounce produces about 3000 plants; 4 ounces plants an acre

	1 oz.	¼ lb	1 lb
Long Island Improved	\$.75	\$2.50	\$8.00
90 days. This strain produces dwarf, compact, uniform-sized plants about 20 inches tall. Produces cabbage like sprouts 1 1/4 to 1 1/2 inches in diameter maturing in succession.			

BROCCOLI

1 ounce produces 2500 plants; 6 ounces plants an acre

	1 oz.	¼ lb	1 lb
De Cicco	\$.60	\$1.75	\$5.00
60 days. An extremely early strain producing medium heads ready for market ten days to two weeks ahead of Early Green Sprouting. Also produces a high percentage of side shoots or sprouts excellent for bunching or freezing.			

Broccoli continued next page

BROCCOLI

1 ounce produces 2500 plants; 6 ounces plants an acre

	1 oz.	¼ lb	1 lb
Early Calabrese	\$.55	\$1.65	\$5.25
70 days. Vigorous early type forming large compact central heads and very few laterals. First heads ready for market in about 70 days from planting under favorable conditions when the seed is planted in the open. Transplanting usually delays maturity about one week.			
Waltham No. 11	\$.75	\$2.00	\$6.00
50 days. Plants 24 inches tall, slightly cupped leaves with little bloom, erect, compact, uniform in maturity. Center head 1½ to 3 inches in diameter; side heads 1 inch in diameter and relatively few in number. Medium green compact curd without flag leaves.			
Waltham No. 29	\$.75	\$2.00	\$6.00
75 days. This is a special strain developed by the Waltham Field Station in Massachusetts. The dwarf, compact plants produce good big center heads with medium fine buds and many side shoots. Seed should be planted during warm weather for fall crop. Do not plant this variety for a spring crop.			

BROCCOLI RAAB

	1 oz.	¼ lb	1 lb
Fall	\$.20	\$.70	\$2.00
A winter annual making heavy, compact top growth early in spring for greens. The leaves are broad, strapleaf, turnip type. It grows 18 to 22 inches tall before going to seed.			
Spring	\$.30	\$.90	\$2.75
Used for early market greens. Must be planted in the spring, as it will not winter over. It is an annual and shoots to seed very rapidly.			

CABBAGE

1 ounce produces about 2500 plants; 6 ounces plants an acre

	1 oz.	¼ lb	1 lb
Badger Market	\$1.00	\$3.00	\$9.00
63 days. Plants are dark green, with small, round, solid heads weighing about 3 pounds, which do not burst prematurely. This variety is highly suited to the present demands of the fresh vegetable market and will tolerate close planting for high economic yields.			
Golden Acre Special	\$.60	\$1.80	\$5.25
60 days. The earliest round-headed Cabbage; especially valuable for early market. Heads round, firm, commonly 6 to 7 inches in diameter and average 3 pounds.			

LATE OR WINTER VARIETIES

	1 oz.	¼ lb	1 lb
Danish Round Head	\$1.00	\$3.00	\$8.00
100 days. Heads are round, extremely solid and heavy, 8 to 9 inches across and weighing 7 to 9 pounds each. A late fall or winter Cabbage with the same good qualities as Penn State Ballhead but shorter stemmed and five days earlier.			
Penn State Ballhead	\$1.00	\$3.00	\$8.00
105 days. Heads flattened, globe shaped, 8 to 9 inches across, 6 to 7 inches deep and average 8 pounds. Excellent for fall market or winter storage as it retains its deep green color. Our strain is produced from stock seed grown at Pennsylvania State College.			
Ferry's Round Dutch	\$.75	\$2.00	\$6.00
71 days. Plants small and compact; stem short. Heads almost ball shaped, commonly 7 to 8 inches in diameter, 6 inches deep and average 5 pounds. Splendid for home and market gardeners. Used in some sections as a wintering over Cabbage.			

Cabbage continued next page

SAVOY CABBAGE

	1 oz.	¼ lb	1 lb
Special Long Island Savoy	\$.75	\$2.00	\$6.00

90 days. Its earliness and adaptability makes it probably the most widely used strain of Savoy Cabbage in this country today. Heads medium large drumhead type, rounded on top, flat at base; 8 inches in diameter, stands a long time without bolting.

YELLOWS RESISTANT VARIETIES

	1 oz.	¼ lb	1 lb
Badger Ballhead (Yellows Resistant)	\$1.00	\$3.00	\$9.00

100 days. A new yellow resistant variety in the Hollander or Danish Ballhead class. Heads 6½ inches in diameter, flattened globe shaped, solid with short core.

Bugner	\$1.00	\$3.00	\$8.00
---------------------	--------	--------	--------

105 days. A late variety extensively used in some sections for market, kraut and storage. Heads large, round or slightly flattened, 7½ to 8 inches in diameter and weighing 8 to 9 pounds.

Globe	\$.80	\$2.25	\$6.75
--------------------	--------	--------	--------

80 days. Plants are 10 to 15 inches tall and medium green. A yellows-resistant type of Glory or Enkhuizen developed in Wisconsin for use on yellows-infested soil. Heads are globular, compact, 6 to 7 inches in diameter and weigh 7 to 8 pounds.

Greenback	\$.90	\$2.75	\$8.00
------------------------	--------	--------	--------

74 days. A new cabbage in the Round Dutch class, about as early as Marion Market, but darker green and more compact. Slow to produce seed stalks. Recommended in market and shipping areas infested by yellows.

Marion Market	\$.75	\$2.25	\$6.75
----------------------------	--------	--------	--------

75 days. This is a yellows-resistant strain of Copenhagen Market that will produce a normal crop on yellows-infested soil. The plant is larger and the leaves are more coarse but with the same round heads and quality as Copenhagen Market.

Racine Market	\$.75	\$2.00	\$6.00
----------------------------	--------	--------	--------

70 days Plant 10 to 12 inches tall, compact, short stemmed, upright distinct blue green leaves with erect growth. Head 6½ inches in diameter, round, solid and of good quality. A yellows-resistant Copenhagen Market type.

Resistant Golden Acre	\$.90	\$2.50	\$7.00
------------------------------------	--------	--------	--------

64 days. This strain of Golden Acre has all the characteristics of that variety but is a few days later and yellows-resistant. Leaves are slightly darker green than regular Golden Acre.

Wisconsin All Seasons	\$.90	\$2.75	\$8.00
------------------------------------	--------	--------	--------

90 days. This is the hardest of all flat-headed varieties. Heads large, 10 to 12 inches across, 8 inches deep, weighing 9 to 10 pounds. Recommended for yellows-infested land, as it is resistant to yellows and Cabbage mosaic.

Wisconsin Hollander No. 8	\$.90	\$2.50	\$7.25
--	--------	--------	--------

105 days. Plants larger and very hardy. The heads are large, round to flattened, very firm and weighing 7 to 9 pounds. A good keeper. This is a very heavy yielder on land badly infested with yellows disease.

RED CABBAGE

	1 oz.	¼ lb	1 lb
Early Red Acre	\$.80	\$2.25	\$6.50

74 days. Plants small, compact and short stemmed. Heads medium size, round, hard and deep red. The earliest red variety.

Special Red Rock	\$.75	\$2.00	\$6.00
-------------------------------	--------	--------	--------

90 days. The standard large red Cabbage; splendid winter keeper. Heads round to slightly flattened globe shape, commonly 8 inches in diameter and weigh about 7 pounds, very hard, purplish in color.

Cabbage continued next page

CABBAGE

CHINESE OR CELERY CABBAGE

	1 oz.	1/4 lb	1 lb
Michihli	\$.40	\$1.00	\$3.00

70 days. The surest-heading strain of Chinese Cabbage we have ever known. Outstanding uniformity makes this a great improvement over the former strains of the Chihli type. Foliage dark green; heads 4 inches thick, 18 to 20 inches tall, tapered near tip; firm, well, blanched, crisp and tender.

CANTALOUPE

1 ounce will plant 75 hills; 3 to 6 pounds to the acre

	1 oz.	1/4 lb	1 lb
Delicious No. 51	\$.50	\$1.50	\$4.00

86 days. If you have been troubled with wilt in your melons, we suggest you try Delicious 51. This is a new fusarium-wilt-resistant type developed by Dr. Munger at Cornell. It is a cross between Iroquois and Delicious. Delicious 51 is not a shipping melon but is a wonderful early variety for home gardens, roadside stands and local markets.

Hales Best No. 936	\$.45	\$1.25	\$3.75
-------------------------------------	---------------	---------------	---------------

83 days. A shipping melon, nearly round, with a solid high net and very uniform in size and shape. Size slightly larger than Hale's Best No. 6. Seed cavity small. Flesh salmon-orange, firm, sweet and spicy.

Harvest Queen	\$.45	\$1.25	\$3.75
--------------------------------	---------------	---------------	---------------

92 days. An Ideal melon because of superior quality, and its ability to stand shipping. It is resistant to Fusarium wilt. Melons are medium size 6½ by 5½ inches, oval, heavily netted with shallow ribs. Flesh deep orange, thick and fine texture with sweet musky flavor.

Hearts of Gold	\$.40	\$1.10	\$3.25
---------------------------------	---------------	---------------	---------------

95 days. Melons 6½ by 5½ inches almost round, distinctly ribbed, abundant fine gray netting over dark green background. Flesh thick, deep salmon colored, fine grained, sweet juicy and small seed cavity.

Iroquois	\$.55	\$1.50	\$4.00
---------------------------	---------------	---------------	---------------

90 days. An important market variety in many sections. Iroquois is resistant to Fusarium Wilt, very attractive and delicious. The fruits are medium large, round to oval, with prominent ribs and good netting; the rind is tough and holds up well in shipping. The fine textured, thick flesh is deep orange with high flavor and sweetness.

Jumbo Jenny Lind Special	\$.55	\$1.50	\$4.00
---	---------------	---------------	---------------

This is about the earliest good cantaloupe we offer. The melons are semi-flat with a pronounced button on the blossom end. They are of excellent quality and at least 50 percent larger than the original strain. Green fleshed.

Pride of Wisconsin	\$.45	\$1.25	\$3.75
-------------------------------------	---------------	---------------	---------------

90 days. A popular variety in New Jersey and on the eastern shore of Maryland and Delaware. Melons oval, weighing 3 to 4 pounds. Rind pearly gray, slightly ribbed, with sparse coarse netting. Flesh orange colored. Seed cavity small. Fine flavor and a very good shipper.

Schoons Hard Shell	\$.45	\$1.25	\$3.50
-------------------------------------	---------------	---------------	---------------

90 days. This melon is especially valuable because of its hard, firm shell, which makes it desirable for shipping. Melons better than average size, deeply ribbed and covered with coarse netting. Skin yellow; flesh salmon colored, sweet and of medium fine grain.

CARROTS

1 ounce plants 150 feet of row; 3 pounds to the acre

	1 oz.	1/4 lb	1 lb
Chantenay Red Cored	\$.35	\$1.00	\$3.00

70 days. Roots are deep reddish orange, 5½ to 6 inches long, 2¼ inches thick at shoulder, tapered stump rooted; core reddish orange, almost the same color as the flesh, which is fine grained and tender. This is an excellent variety for canners.

Carrots continued next page

CARROTS

1 ounce plants 150 feet of row; 3 pounds to the acre

	1 oz.	¼ lb	1 lb
Danvers Red Cored	\$.35	\$1.00	\$3.00
75 days. Very productive and popular for home and market gardeners. Roots about 7 inches long, 1¼ inches thick uniformly tapered to blunt end. Flesh bright orange, crisp and tender. Fine for bunching or bushel Carrots.			
Gold Spike	\$.50	\$1.50	\$4.00
77 days. Developed for a refined, short top bunching type. Tops are 4 inches shorter and roots average longer and more slender than Imperator long strain. Dark green tops, exterior color deep orange; interior uniform deep orange with small core.			
Hicolor	\$.40	\$1.15	\$3.25
80 days. This variety originated at the Waltham Field Station, Waltham, Mass. This particular stock is quite brilliant in color. The roots are long and slim with a good dark red color. Being of the Hutchinson type makes it an exceptionally fine carrot, under certain growing conditions, for both packaging and bunching. Also, of vital importance, the plant is resistant to leaf blight.			
Hutchinson (Waltham Strain)	\$.40	\$1.15	\$3.25
80 days. This carrot is very popular with the market gardeners in New England. Strong tops, ideal for bunching. Roots 10 inches long, 1½ inches thick, deep orange with greenish shoulder, nearly cylindrical. Very tender. Ours is an exceptionally good northern grown strain.			
Imperator Long	\$.35	\$.90	\$2.75
77 days. An improved strain of Imperator that is noticeably longer and more slender. On loose deeply prepared soil roots will make remarkable length. Heavy, tops excellent for bunching. Roots 9 to 11 inches long, 1½ inches wide at shoulder, tapering to a nearly pointed tip. Smooth deep orange. Ideal bunching Carrot and good shipper.			
Nantes Long	\$.35	\$.90	\$2.75
68 days. Small tops; roots bright orange, 6 to 7 inches long, 1½ inches thick, cylindrical, stump rooted. Flesh bright orange, fine quality; core inconspicuous. Grown exclusively in muck lands.			

CAULIFLOWER

1 ounce will produce 2500 plants; 6 ounces enough for an acre

	1 oz.	¼ lb	1 lb
Early Snowball	\$4.00	\$12.00	\$35.00
55 days. Plants of medium height with rather waved and crumpled leaves which bend outward at the tips. Inner leaves cover the head well. Foliage is medium green. Heads of good depth, solid, ivory-white, and of fine quality. Early and very even in time of maturity. Adapted for summer and early fall harvest.			
Snowdrift Special	\$4.00	\$12.00	\$35.00
57 days. A vigorous strain of Snowball with medium green outer leaves; inner leaves protect the large, firm, solid, white head. Excellent for long-distant shipping.			
Super Snowball	\$4.00	\$12.00	\$35.00
55 days. An early maincrop variety that is so named because of its uniform production of beautiful heads. One of the most profitable strains for market gardeners and shippers. The plants are dwarf, compact upright; inner leaves curl over the head. Heads are 6½ to 7½ inches across, deep, solid, and uniform. Snowy white of superb quality for canning and freezing.			

CELERY

1 ounce produces about 5000 plants; ¼ pound plants an acre

	1 oz.	¼ lb	1 lb
Cornell No. 19	\$2.75	\$7.00	\$21.00
100 days. Developed from a cross between Golden Self Bunching and Utah, combining the good qualities of the Pascal Type with the early easy blanching character and color of Golden Self Bunching. Highly resistant to Fusarium yellows. Averages 9 inches to joint with an overall height of 24 to 25 inches. Hearts are long and comparatively full. Stems thick, rounded, smooth.			

Celery continued next page

CELERY1 ounce produces about 5000 plants; $\frac{1}{4}$ pound plants an acre

	1 oz.	$\frac{1}{4}$ lb	1 lb
Green Light	\$3.00	\$9.00	\$25.00
125 days. This is the original strain of this variety. It has compact full plants, well squared at the base, erect in growth and can be packed with practically no breakage. The stems are very numerous, extra thick and well rounded, of excellent quality. Not recommended for early planting as it may produce seeders but fine for Summer and Fall. Use this strain on deep muck, on fertile upland or where closer spacing is used.			
Summer Pascal (Walihan Strain)	\$2.00	\$6.00	\$16.00
115 days. Plants of medium height but with good length to the first joint. Blanches more readily than some other strains of Pascal Celery. It bleaches easily with paper or boards. The stalks are nearly round, smooth and of outstanding quality. Truly a choice product, fast replacing the white type.			
Utah 52-70	\$3.00	\$8.50	\$25.00
130 days. Overall height 28 to 30 inches ribs are $9\frac{1}{2}$ to 11 inches long, rounded, thick, smooth and waxy, medium dark green, giving a better rib length than older Utah strains. Highly resistant to "Brown Check"			

CELERIAC

1 ounce plants 800 feet of row, or will produce about 10,000 plants

	1 oz.	$\frac{1}{4}$ lb	1 lb
Giant Smooth Prague	\$.80	\$2.75	\$8.00
110 dys. Turnip-rooted Celery. Plants are dark green with tubular stalks. Roots are 3 to 4 inches in diameter, globular, fairly smooth. Bulbs used for adding celery flavor to soups.			

CHICORY

1 ounce plants 80 feet of row; 4 pounds to an acre

	1 oz.	$\frac{1}{4}$ lb	1 lb
Cicoria Catalogna	\$.50	\$1.25	\$3.75
65 days. A rapidly-growing annual producing dandelion-like leaves that are very popular for early greens. Leaves and flower shoots tender with faint asparagus flavor. Our stock is the true cut-leaved, fibrous-rooted type.			
Ciccoria San Pasquale	\$.50	\$1.25	\$3.75
65 days. Foliage deeply cut, shorter than regular Ciccoria Catalogna and lighter in color. 40-50 leaves per plant, erect and compact. Does not have the asparagus shoot in center.			

COLLARDS

1 ounce plants 400 feet of row; 4 ounces plants an acre

	1 oz.	$\frac{1}{4}$ lb	1 lb
Georgia	\$.25	\$.60	\$1.75
75 days. A non-heading form of Cabbage grown extensively for greens by market gardeners in the South. Plant 2 to 3 feet tall, erect, spreading. Forms a loose cluster or head of tender leaves.			
Vates	\$.30	\$.80	\$2.25
90 days. Similar to Georgia Collards in shape and habit of growth, but has an emerald-green color instead of the usual bluish green and the leaves have a glossy or oily appearance.			

HYBRID SWEET CORN $\frac{1}{4}$ pound will plant 100 feet of row in hills; 10 pounds to the acre

	1 lb	10 lb	100 lb
Aristogold Bantam Evergreen	\$.80	\$.75	\$.70
93 days. If you live where Corn crops are hurt by wind, heat or drought, this hybrid answers your problems. Plants are sturdy and vigorous averaging $8\frac{1}{2}$ feet tall, free from suckers and dark green. The ears are 10 inches long with 16 to 18 rows of exceptionally deep juicy, high quality golden kernels. Husks are tight resisting ear worms. This Corn has yielded 10 tons of marketable ears per acre.

HYBRID SWEET CORN

$\frac{1}{4}$ pound will plant 100 feet of row in hills; 10 pounds to the acre

	1 lb	10 lb	100 lb
Carmelcross Improved	\$.65	\$.60	\$.55
78 days. Essentially Carmelcross with a more rugged plant and a larger ear, mostly two per stalk. Very uniformly maturing. A second-early Corn with many excellent qualities. Deep yellow kernels, 12 to 14 rows per ear. Highly resistant to disease.			
Earliking	\$.90	\$.85	\$.80
66 days. Developed to obtain a first early high quality hybrid. Plants 5 to 5 $\frac{1}{2}$ feet tall, ear height 15-18 inches, scant foliage, few suckers. Ears 7 to 8 inches long, mostly 12 rows, 1 $\frac{1}{4}$ in hes in diameter with long flag ears. Popular with market gardeners in northern areas.			
FM Cross	\$.80	\$.75	\$.70
80 days. Height of plant 6 $\frac{1}{2}$ feet, ears 8 to 8 $\frac{1}{2}$ inches long, 14 to 16 rows narrow, tender deep, and rich light golden kernels. Ears are well covered at the tip, cylindrical, borne high on the plant. Has superior yield, quality and flavor.			
Golden 22	\$.90	\$.85	\$.80
79 days. A new hybrid in the Carmelcross season. Plants taller and more vigorous than Carmelcross, with ears borne higher on the stalk. Highly resistant to wilt. Ears slightly longer and thicker than Carmelcross, mostly 12 to 14 rows, well filled to the tip.			
Golden 199	\$.85	\$.80	\$.75
84 days. Ears 7 $\frac{1}{2}$ to 8 inches long, 18-20 rows, 2 $\frac{1}{2}$ inches in diameter. Blocky ear, narrow deep kernel, good quality for such a large ear. Plants 7 $\frac{1}{2}$ to 8 feet tall, wide dark green leaves, few suckers, good vigor, medium long shanks, easy snapping.			
Golden Beauty	\$.75	\$.65	\$.60
68 days. A new All-America for 1955. Plant 5 to 6 feet tall. Very few suckers, dark green leaves. Wilt resistant. Ear 7 $\frac{1}{2}$ to 8 inches long. Well filled tips with kernels of medium width and depth. Good dark green husk coverage with white silk. A very attractive ear and plant.			
Golden Cross Bantam	\$.65	\$.60	\$.55
88 days. Most widely used of all hybrids for canning, freezing, market and shipping. Usually two ears 8 inches long, each with 12 to 14 rows; fairly heavy husks. Stalks 6 $\frac{1}{2}$ to 7 feet high. Quite uniform in maturity and ear characteristics.			
Golden Dawn Improved	\$.85	\$.75	\$.70
65 days. This variety is the earliest one we list. Plants are strong and grow about 5 feet tall. The ears are 6 $\frac{1}{2}$ inches long and have 12 to 14 rows of medium yellow kernels. The husk is very heavy, which gives good protection and coverage to the end of the ear. If you are looking for an extra-early yellow corn that has good quality and will stand the cold wet weather in early spring you should plant Golden Dawn.			
Golden Security	\$.85	\$.80	\$.75
83 days. Ears are 8 to 8 $\frac{1}{2}$ inches long by 1 $\frac{1}{2}$ inches in diameter. 14 to 16 regular straight rows produce a good type cylindrical ear. The tight vigorous husk restricts ear worm damage to the extreme tip of the ear. Plants 7 $\frac{1}{2}$ feet tall, very sturdy stalk and wide vigorous foliage. Excellent deep root system is insurance against drought.			
Gold Rush	\$.85	\$.80	\$.75
70 days. An early yellow hybrid, ideal for home and market gardeners everywhere. It matures quickly and holds its eating stage for a long time. Ears 8 $\frac{1}{2}$ inches long, 12 to 14 rows, well filled to the tip, tight husk, long dark green flags. Plant 6 feet tall, good foliage, sturdy, vigorous, moderate tillers. Occasionally 2 good ears per stalk.			
Illinois Narrow Grain Evergreen, 14x11	\$.80	\$.75	\$.70
93 days. A new white variety with a narrow grain and high sugar content, which has made it very popular with market gardeners. Plant 8 feet tall, vigorous, with few suckers and good ear height. Ear 8 inches long, with 16 to 20 rows; kernels narrow, deep and of good quality.

HYBRID SWEET CORN

¼ pound will plant 100 feet of row in hills; 10 pounds to the acre

	1 lb	10 lb	100 lb
Iochief	\$.75	\$.70	\$.65

89 days. A new introduction that is very outstanding for longer ears, heavy tonnage and superior flavor. Ears are 9 inches long, with 14 to 18 rows of deep golden kernels, very uniform. This Corn has very good eating qualities. Ideal for canning and the market.

Iroquois Golden	\$.80	\$.75	\$.70
------------------------------	---------------	---------------	---------------

90 days. Plants are 8 to 8½ feet tall, dark green and free from suckers. The ears run 9 to 10 inches long with 16 to 18 rows of Golden kernels. This variety is noted for making ears during dry weather.

Marcross, 13x6	\$.65	\$.55	\$.50
-----------------------------	---------------	---------------	---------------

73 days. A very desirable early maturing variety. Plants 5 to 6 feet tall, many with two ears per stalk and highly resistant to bacterial wilt. Golden yellow ears 6½ to 7½ inches long, 10 to 14 rowed with good green husk coverage and very uniform.

Stowells Evergreen	\$.75	\$.65	\$.60
---------------------------------	---------------	---------------	---------------

95 days. Ears 7½ to 8½ inches long, with 16 to 18 rows of narrow, very sweet kernels. Recommended for home or market garden, freezing and canning. Stalks grow 8 to 10 feet tall. This hybrid will out yield the old open-pollinated strain and is actually more widely adapted.

ORNAMENTAL CORN

	1 lb	10 lb	100 lb
Squaw	\$1.25	\$1.15	\$1.00

Used chiefly for decorating, especially around Halloween. Each ear contains vari-colored kernels. Also known as Indian Corn.

CUCUMBERS

1 ounce plants 100 hills; 3 to 6 pounds per acre

	1 oz.	¼ lb	1 lb
Ashley	\$.40	\$1.15	\$3.25

66 days. Developed at Clemson Truck Experimental Station, South Carolina for shipping. Resistant to downy mildew. Vigorous vines are heavily productive. Fruits are dark green, 8 inches long, and 2¼ inches in diameter, and taper to the stem end.

Burpee Hybrid	\$4.25	\$12.50	\$35.00
----------------------------	---------------	----------------	----------------

60 days. The outstanding feature of this hybrid slicing Cucumber is its high resistance to mosaic and downy mildew. Vines are very vigorous and bear a large number of well-formed Cucumbers 8 inches and more long, 2½ inches wide, square at both ends, with medium seed cavity and crisp white flesh of excellent quality. Burpee Hybrid Cucumber outyields open pollinated varieties because the vines continue to produce long after others have died.

Marketer	\$.35	\$1.00	\$3.00
-----------------------	---------------	---------------	---------------

70 days. Fruits 8 to 10 inches long, 2¼ inches in diameter, with a very small seed cavity. Its uniform shape and attractive dark green color all over, even on the ground side, makes it one of the best early varieties for commercial growers. Vines vigorous and prolific.

National Pickling	\$.30	\$.90	\$2.75
--------------------------------	---------------	---------------	---------------

56 days. The principal pickling variety. Used for both dill and small pickles. Fruits 6 inches long and 2½ inches thick; prolific, black spined, medium dark green, rather blunt at each end and of excellent pickling qualities.

Cucumbers continued next page

CUCUMBERS

1 ounce plants 100 hills; 3 to 6 pounds per acre

	1 oz.	¼ lb.	1 lb.
Ohio M R 17 Mosaic Tested	\$.30	\$1.00	\$3.00
57 days. Fully grown dark green cucumber of this mosaic resistant pickler are about 7 inches long and 2 inches in diameter. Good size and shape for use all the way from small sweet pickles to large dills. High yielding, vigorous vines.			
Palomar	\$.35	\$1.00	\$3.00
64 days. Downy mildew resistance and earliness make this an outstanding new shipping variety. Fruits are shaped like marketer but slightly longer and darker.			

DANDELION

1 ounce plants 200 feet of row

Arlington Thick Leaf	Prices on request
60 days. A very superior strain. Makes very vigorous compact growth. Produces a spreading rosette of leaves 18 to 24 inches across, leaves very numerous, thick texture and blanch readily.	

EGG PLANT

1 ounce produces about 2000 plants; ¼ pound plants an acre

	1 oz.	¼ lb.	1 lb.
Black Beauty	\$1.00	\$2.75	\$8.25
75 days. Plants 24 to 30 inches tall, commonly bearing 4 to 6 large fruits which are broad, egg shaped and smooth; uniform and very rich dark purple, retaining the color for a long time. Suitable for freezing. Valuable for market and home gardens.			
Florida High Bush	\$1.00	\$2.75	\$8.25
85 days. Plants are of strong, upright, vigorous growth and bear many large, elongated, dark purple fruits of uniform size well above the ground. Somewhat resistant to fruit rot and blight.			
Fort Meyers Market	\$1.00	\$2.75	\$8.25
85 days. Vigorous and very productive, high bush variety, holding fruits well off the ground. Fruits ideal size for shipment, 9 to 10 inches long, 5½ to 6½ inches in diameter, nearly egg shaped, broadest near blossom end. Outstanding for deep, purplish black color and high gloss.			

ENDIVE

1 ounce plants 200 feet of row; 2 pounds to the acre

	1 oz.	¼ lb.	1 lb.
Green Curled	\$.30	\$.90	\$2.60
95 days. Plant 16 inches across, medium green, deeply cut and fringed outer leaves. Leaves can be tied up for further blanching, stems green.			
Green Curled Pink Ribbed	\$.30	\$.90	\$2.75
95 days. Also known as Large Curled Pancalier. A late, coarsely toothed variety for good size, which forms a good blanched heart in the late fall. The midrib or leaf stem is tinged with rose.			
Premier	\$.50	\$1.50	\$4.00
The largest of all endive, measuring 22 to 24 inches across. Withstands cold weather and is very hardy. Has a full heart, is fine curled and blanches very easily. Has a green rib and good on muck soils.			

ESCAROLE

1 ounce plants 200 feet of row; 2 pounds to the acre

	1 oz.	¼ lb	1 lb
Florida Deepheart	\$.30	\$.90	\$2.75
71 days. The plants are larger, with extra deep, well-filled hearts that blanch to clear creamy yellow. Outer leaves turn upward making the plant less susceptible to bottom rots than most endives.			
Full Heart Batavian	\$.30	\$.90	\$2.75
85 days. Leaves large, forming immense, round plants up to 16 inches across with very deep, full, compact, well-blanchd hearts that are of thick, buttery texture.			

HERBS

	1 oz.	¼ lb	1 lb
Dill	\$.20	\$.55	\$1.60
70 days. One ounce plants 200 feet of row; 5 pounds to the acre. Annual, about 2 to 3 feet tall of strong aromatic odor and mildly pungent flavor. Grown for seed clusters used in making dill pickles.			
Florence Fennel	\$.40	\$1.10	\$3.25
60 days. One ounce will plant 75 feet of row; 8 to 10 pounds to the acre. Also known as finocchio. Plant 2 to 3 feet tall. Chiefly grown for the bulb-like structure formed by the enveloping thickened bases of the leaf stalks.			

KALE

1 ounce plants 200 feet of row; 3 pounds an acre

	1 oz.	¼ lb	1 lb
Dwarf Blue Scotch Vates	\$.35	\$1.00	\$2.90
55 days. Low-growing, compact, short stemmed plants with finely curled bluish green leaves. Our stock of the variety is unsurpassed.			
Dwarf Green Curled	\$.30	\$.85	\$2.50
55 days. Plant 12 to 14 inches tall, leaves large, bright green, finely curled and plumed. Hardy, popular and widely grown.			
Dwarf Siberian	\$.30	\$.85	\$2.50
60 days. Plants very large, 12 to 15 inches tall, with spread of 3 feet or more. Leaves large, thick in texture, coarse, plum-like with margin frilled and waved. Slow to run to seed in the spring.			

KOHL RABI

1 ounce plants 200 feet of row; 4 pounds to an acre

	1 oz.	¼ lb	1 lb
White Vienna Short Leaved	\$.50	\$1.50	\$4.00
55 days. Plant 10 to 12 inches, leaf and stem medium green. Bulb 2 inches in diameter, globe shaped, skin pale green, flesh white. Most popular short leaved variety.			

LEEK

1 ounce plants 150 feet of row; 4 pounds an acre

	1 oz.	¼ lb	1 lb
American Flag	\$.70	\$1.90	\$5.50
130 days. Also known as Broad London. Stem 8 to 10 inches long and 1½ to 2 inches thick, of excellent quality, the white part extending well up the stalks. Very mild flavor.			
Musselburg	\$.60	\$1.75	\$5.00
150 days. Long, thick white stemmed with drooping, bright, medium green leaves; similar to American Flag, but longer stemmed. Stems 1 to 1½ inches thick and 9 to 10 inches long.			
Special Winter	\$.75	\$2.00	\$5.50
165 days. Very thick, shorter stemmed strain, having deep blue green, more erect leaves, productive type and also more hardy at low temperature, stems 2 to 2½ inches thick and 5½ to 7½ inches long.			

LETTUCE

1 ounce plants 400 feet of row; 3 pounds an acre

	1 oz.	1/4 lb	1 lb
Empire	\$.90	\$2.75	\$8.00
A head lettuce of the crisp variety, of fairly high quality. The heads are medium size, medium green and extremely slow bolting. Empire is relatively tolerant to tip burn.			
Grand Rapids	\$.35	\$.90	\$2.50
45 days. The easiest to grow of all Lettuces. Forms a large bunch of intensely fringed and curled leaves which are exceedingly tender, crisp and sweet. Grows equally well during the spring, summer and fall.			
Great Lakes	\$.70	\$1.90	\$5.75
90 days. This fine new Lettuce was developed at the Michigan Agricultural Experiment Station. It surpasses all other varieties in its ability to make good heads in warm weather. Great Lakes has very large, well-folded leaves and produces hard, well-formed heads under a large range of conditions. We are proud of our strain of this variety.			
Great Lakes No. 659	\$1.00	\$2.50	\$7.25
80 days. The head is large, round, very firm and is completely covered by over folding extra large fringed dark green leaves. Particularly resistant to cold damage, it has seldom been known to sunburn or tip burn. One of the most adaptable and widely planted of all Great Lakes types.			
Great Lakes, 6238	\$.90	\$2.50	\$7.25
82 days. Our strain is used extensively in the East on account of its ability to withstand unfavorable conditions. Repeated plantings in all growing areas indicate this is the surest heading strain of Great Lakes. Plants large, vigorous, deep green. Heads good size, well covered until heads mature. Carries well for long distance shipping.			
Imperial, 455	\$.80	\$2.45	\$7.00
84 days. Was developed at Cornell University for those who wish to grow head Lettuce in late spring and summer. Heads large, solid, of light green color, with prominent ribs. Has a larger frame and head than Great Lakes, is somewhat resistant to tip burn and can be sown indoors and transplanted in the spring since it is earlier than Great Lakes.			
Pennlake	\$.75	\$2.25	\$6.50
75 days. The result of a cross of Great Lakes by Imperial No. 847 made at Pennsylvania Agricultural Experiment Station. Much more uniform in plant and head type, insuring many marketable heads at first cutting. The compact heads are of excellent quality, with dark green, smooth foliage and without objectionable ribbiness. They are protected from scald by broad enfolding wrapper leaves. Pennlake may be grown unusually free from tip burn as an early summer crop from plants or seeded directly in the field. It also does well as a fall crop in field or frames.			
Phoenix Great Lakes M T	\$.90	\$2.75	\$8.50
83 days. An excellent new upland lettuce for the northeastern states. Phoenix resembles 659 but the plants and heads are smoother and darker green. Not adopted to summer crop on muck. Seed mosaic indexed.			
Premier Great Lakes	\$.70	\$2.10	\$6.15
80 days. This strain is recommended for growing on upland soils as an early maturing crop either transplanted or seeded. This variety produces heads from 7 to 10 days earlier than standard Great Lakes. Bred also for reduction in ribbiness and for uniformity of heading. It has produced better than 9 per cent marketable heads at first cutting. The heads are usually solid, practically round, up to 7 inches in diameter and 2 pounds in weight. Outer leaves are somewhat flattened, smooth and without ruffled margins. Due to its slow bolting habit and resistance to tip burn, it may be planted in succession for a summer crop in widely diversified areas.			
Unrivalled White Big Boston	\$.35	\$.90	\$2.75
73 days. A butterhead type similar to Big Boston except it is lighter in color and does not have the reddish brown tinge on the margins of the leaves. It is a truly fine strain for local marketing.			

Lettuce continued next page

LETTUCE

1 ounce plants 400 feet of row; 3 pounds an acre

	1 oz.	¼ lb	1 lb
White Boston Cabbage Head Special	\$.50	\$1.50	\$4.00

73 days. Large, uniform, solid heads resembling Big Boston but earlier, lighter green in color and without the reddish tinge on the outer leaves. Heads are tightly folded so that the large solid heart blanches to a bright creamy yellow; tasty, crisp and always tender. This is the finest of all the butterhead varieties.

White Boston — Muck Strain	\$.35	\$.90	\$2.75
---	---------------	---------------	---------------

76 days. Our strain of this variety is very well suited for growing on muck. The heads are of the butterhead type, leaves larger and brighter green and less blistered than Big Boston, interior creamy yellow.

Write us for samples of Lettuce seed to try.

COS LETTUCE

	1 oz.	¼ lb	1 lb
Eiffel Tower	\$.50	\$1.50	\$4.00

72 days. A tall compact variety with well folded leaves, more cylindrical than the usual Cos types. Seed black.

Dark Green	\$.30	\$.90	\$2.75
-------------------------	---------------	---------------	---------------

70 days. A medium large, dark green variety which forms a good-sized, firm well-folded head.

Paris White	\$.30	\$.90	\$2.75
--------------------------	---------------	---------------	---------------

70 days. Popular variety for the home and market garden. It is crisp, has a refreshing sweet flavor, and does not need tying up in order to blanch the heart. Compact, erect plants 10 inches tall with medium light outer leaves and whitish green brittle interior.

Parris Island	\$.50	\$1.50	\$4.00
----------------------------	---------------	---------------	---------------

70 days. This is the first mosaic resistant lettuce known to be developed. It is a dark green type cos, heading exceptionally well and very uniform. Although not completely resistant to mosaic, it continues to grow and form fine marketable heads in mosaic infested areas where dark green and Paris White will not succeed.

MUSTARD

1 ounce plants 200 feet of row; 4 pounds an acre

	1 oz.	¼ lb	1 lb
Fordhook Fancy	\$.20	\$.50	\$1.50

40 days. Dark green, short-stemmed deeply curled, fringed leaves curving backward. Of mild flavor. Plants of vigorous growth, yielding heavily. Fine for salad or cooked for greens like spinach.

Green Wave	\$.25	\$.60	\$1.80
-------------------------	---------------	---------------	---------------

42 days. A long standing slow bolting mustard, with broad rich dark green leaves which are curled and frilled along the edges. A very heavy yielding variety. This was a bronze medal winner in the All American Trials.

Southern Giant Curled	\$.20	\$.50	\$1.50
------------------------------------	---------------	---------------	---------------

60 days. Leaves large, wide, bright green and very curly on the edges. A heavy producer for home gardens and market. Slightly pungent, crisp and tender. The plant, although slightly spreading, is quite upright in growth. Very Hardy.

OKRA

1 ounce plants 60 feet of row; 8 pounds an acre

	1 oz.	¼ lb	1 lb
Dwarf Green Long Pod	\$.20	\$.50	\$1.50

55 days. A very early, dwarf-growing, sturdy variety, producing an abundance of long, fluted, dark green pods. Plants 2½ to 3 feet tall.

ONION

1 ounce plants 100 feet of row; 5 pounds an acre

	1 oz.	¼ lb	1 lb
Beltsville Bunching	\$2.00	\$6.00	\$15.00

60 days. A bunching Onion very similar to Evergreen White Bunching, with maturity time about the same as Evergreen. This is a very good summer onion.

Evergreen White Bunching	\$.75	\$2.00	\$5.50
---------------------------------------	---------------	---------------	---------------

60 days to green onions. Does not form bulbs. Grown for its long, slender, silvery white stalks which are used for green bunching Onions or scallions. In the East seed is usually planted in late summer and wintered over for early spring bunching Onions.

Hi-Shi-Ko or Japanese Bunching	\$.60	\$1.55	\$4.50
---	---------------	---------------	---------------

Large, coarse leaves, large pencil type of onion suitable for bunching only, never forms a bulb. Produces clusters of silvery white stalks often 6 inches long and ½ to ¾ of an inch in diameter. Plants are hardy and can be wintered over.

Perfecto Blanco	\$.90	\$2.50	\$7.00
------------------------------	---------------	---------------	---------------

A new onion selection with a mild flavor derived from white sweet spanish. High yielding, has long, thick tender stems, bluish green in color. Semi hardy under severe winter conditions. Especially selected for the market grower who bunches or wants a good dry white onion.

Southport White Globe	\$.65	\$1.90	\$5.50
------------------------------------	---------------	---------------	---------------

115 days. Most attractive large round Onion with pure paper-white skin. The flesh is also pure white. A main-crop variety which will keep well for some time in fall storage. It is always a ready seller in the market and also used extensively for bunching.

Southport Yellow Globe	\$.60	\$1.80	\$5.75
-------------------------------------	---------------	---------------	---------------

115 days. The most popular of the Southport type. Perfectly globe shaped, with rather full shoulder, small neck, rich yellow skin, and mild creamy white flesh. Very productive and a good keeper.

PARSLEY

1 ounce plants 400 feet of row; 3 pounds an acre

	1 oz.	¼ lb	1 lb
Double Moss Curled	\$.40	\$1.00	\$2.75

70 days. This variety grows to a height of about 8 inches. Rich dark green; leaves are finely cut. One of the best early varieties of curled Parsley, which also resists frost.

Hamburg Parsnip Rooted	\$.35	\$.80	\$2.25
-------------------------------------	---------------	---------------	---------------

90 days. The root of this variety is edible and resembles a slender parsnip in color and shape. The flesh is white, dry, and similar to celeriac in flavor. Will withstand severe cold weather.

Parsley continued next page

PARSLEY

1 ounce plants 400 feet of row; 3 pounds an acre

	1 oz.	¼ lb	1 lb
Plain or Celery Leaf	\$.50	\$1.25	\$3.25
75 days. The leaves of this variety are darker green, deeper cut and heavier than Italian or plain leaf.			
Plain or Italian	\$.30	\$.75	\$2.00
75 days. The standard variety of plain-leaved Parsley used chiefly for flavoring. Leaves dark green, deeply cut but not curled.			

PARSNIP

1 ounce plants 200 feet of row; 3 pounds an acre

	1 oz.	¼ lb	1 lb
All American	\$.25	\$.65	\$1.75
125 days. A newer variety in demand in many sections because of its smooth white appearance. Roots are remarkably free from side roots. Hollow crown with medium wide shoulder.			
Hollow Crown No. 10	\$.25	\$.65	\$1.75
110 days. Roots 9 to 11 inches long, 2½ to 3 inches in diameter at shoulder, creamy white, tender flesh, Hollow Crown, small collar, fairly smooth and almost free of fibrous roots.			

PEAS

1 pound plants 100 feet of row; 1½ bushel an acre

	1 lb	10 lb	1 bus. 56 lb
Alderman	\$.45	\$.35	\$.30
75 days. Splendid large-podded variety of the Telephone type for home, market garden, shipping and freezing. Pods are dark green, 5 inches long, straight, pointed, well filled and with 8 to 10 extra large Peas. Vines 4½ feet tall, depending on growing conditions.			
Freezonian	\$.55	\$.40	\$.35
63 days. Vines grow 2½ feet tall and bear a big crop of dark green, blunt pods 3½ inches long, filled with 7 or 8 most luscious, deep green Peas. The tender skin does not peel or loosen in freezing. It is excellent for quick freezing as well as being valuable for home and market gardeners.			
Gradus	\$.50	\$.40	\$.35
62 days. A large-podded variety suitable for home or market garden and freezing. Plants grow about 3 feet tall and produce a crop of medium green, broad, pointed pods containing 7 to 9 large, tender Peas. Heavy producer.			
Progress No. 9	\$.55	\$.45	\$.40
60 days. Splendid variety for home, market garden and shipping. Vines 16 to 18 inches tall. Dark green pods 4 to 4½ inches long, containing 7 to 9 large Peas of excellent quality.			
Little Marvel	\$.50	\$.45	\$.40
62 days. This variety seems to be adapted to a wider area than any other kind. Plants grow 18 inches tall and yield heavily; pods are 3 inches long and filled with 5 to 7 dark green Peas.			

Peas continued next page

PEAS

1 pound plants 100 feet of row; 1½ bushels an acre

	1 lb	10 lb	1 bus. 60 lb
Thomas Laxton	\$.50	\$.45	\$.40
60 days. Unsurpassed as an early, high-quality, all-purpose Pea. Vines grow 30 inches tall and bear a good crop of large, deep green pods which average 3½ inches in length; they are broad, straight and have square ends. Pods contain 6 to 8 large, tender, fine-flavored Peas. Suitable for freezing.			
Wando	\$.50	\$.45	\$.40
70 days. Wando is a Pea that can be planted as late as July 1st and still get a crop of good high quality peas. It is very resistant to heat, has excellent flavor and freezes well.			
Worlds Record	\$.50	\$.45	\$.40
57 days. Vines grow about 30 inches tall and bear an enormous crop of pods 3½ inches long, nearly straight, pointed at tip, medium green, and holding 7 to 9 large tender Peas. A tall-growing, early, large-podded variety. A general favorite for market and freezing.			

PEPPER

1 ounce produces about 2000 plants; one pound plants an acre

	1 oz.	¼ lb	1 lb
Cuban or Cubanell	\$1.50	\$4.00	\$12.00
62 days. Similar to Neapolitan but paler, more yellowish in color, and said to be resistant to heat and rain.			
California Wonder Low Bush Special Stock ..	\$1.30	\$3.50	\$10.00
75 days. A special selection of California Wonder. Peppers are larger and thicker walled than California Wonder.			
Early Calwonder	\$.95	\$2.75	\$ 8.25
67 days. An earlier and more productive strain of California Wonder. Fruits blocky, smooth, with thick, mild, sweet flesh. Fine for shipping in shorter season areas.			
Giant Wonder Yellow Resistant	\$1.50	\$4.25	\$12.00
74 days. Selected to rigid uniformity, thickness of meat excellent for shippers and canners who require the very best. Plant about 24 to 28 inches tall upright. Vigorous, clean growth. Peppers 4½ inches long and 3¾ inches across, mostly 4 lobed, borne upright, some becoming pendant, flesh is sweet and very thick, making solid peppers.			
Large Thick Cayenne	\$.90	\$2.60	\$ 7.50
70 days. The most popular long hot Pepper. The fruits are 6 to 8 inches long, 1 to 1½ inches thick at the shoulder, inclined to be smooth and curved.			
Neapolitan	\$.95	\$2.85	\$ 8.50
60 days. A very early, medium large, prolific variety. Fruits upright, 4 inches long and 2 inches thick, three lobed. Yellowish green, becoming bright red: Extremely mild and sweet. Also known as "white caps;" largely used for frying.			
Sunnybrook	\$.90	\$2.75	\$ 8.25
75 days. Fruits are tomato shaped, 2 inches deep, 3 inches in diameter, smooth, glossy, dark green turning to deep scarlet-red. Flesh is thick and sweet. Also known as Sweet Cheese.			
World Beater Special	\$.90	\$2.75	\$ 7.75
70 days. Standard early shipping Pepper. Fruits large, oblong, commonly 5 inches long and 3½ inches in diameter, deep green becoming bright deep red; flesh thick, sweet. Plants upright, vigorous, producing a heavy set.			

Pepper continued next page

PEPPER

1 ounce produces about 2000 plants; one pound plants an acre

	1 oz.	¼ lb	1 lb
Yolo Wonder	\$1.10	\$3.25	\$ 9.50
80 days. Plants are 2½ feet tall, very compact and erect, with longer leaves than California Wonder. Peppers are 3½ to 4 inches in diameter and 4 to 4½ inches long, mostly four lobed. Yolo Wonder has the ability to produce a higher percentage of fruit than the older strain of California Wonder.			

PUMPKIN

1 ounce plants 25 hills; 3 to 4 pounds an acre

	1 oz.	¼ lb	1 lb	10 lb
Connecticut Field	\$.25	\$.75	\$2.00	\$1.90
115 days. Also known as Face Pumpkin. Large, round or slightly oval fruits with a hard, smooth, rich reddish orange skin and thick, dry orange-yellow flesh. Vines make a vigorous growth. This Pumpkin, which weighs about 25 pounds, is grown chiefly for window decorations at Hallowe'en.				
Jack O'Lantern	\$.35	\$1.10	\$2.75	\$2.50
110 days. Fruits 8 inches deep, 8 inches wide, round, orange, smooth, flesh orange yellow, thick. Fruit size between small Sugar and Connecticut Field. A fine variety for Jack O'Lantern.				
Large Cheese	\$.30	\$.85	\$2.10	\$2.00
110 days. Large, round, flattened, slightly ribbed, with creamy buff skin and fine-grained, thick yellow flesh. Splendid for stock or table use as well as for canning.				
Small Sugar	\$.25	\$.75	\$2.00	\$1.90
105 days. Round, slightly ribbed fruits of medium size, about 7 inches in diameter, with thick, bright orange skin and rich orange flesh. One of the best Pumpkins for table decorations and making pies.				

RADISH

1 ounce plants 100 feet of row; 10 pounds an acre

	1 oz.	¼ lb	1 lb	10 lb
Cavalier	\$.25	\$.45	\$1.25	\$1.10
23 days. Tops small, but long enough for bunching. Roots oval, globe shape. bright scarlet; firm, crisp flesh and thin tap root. Especially adapted for forcing or growing on muck land and upland soil.				
Champion	\$.25	\$.50	\$1.50	
28 days. A very bright round or ball shaped radish with a slender tap root. Larger than Scarlet Globe. It holds for a long time without becoming pithy. Primarily an outdoor variety but may be tried for indoor growing as well. Can be sown early and still make good tops for bunching.				
Cherry Belle	\$.25	\$.45	\$1.35	\$1.25
22 days. Tops are short, roots are perfectly round, tap root small, color bright cherry red. Cherry Belle's outstanding feature is its long keeping quality, as it remains solid long after other bunching varieties have become pithy. Flesh is sparkling white, crisp and of mild flavor. While Cherry Belle is primarily intended as a forcer, it does equally well when planted in the open as a summer or early fall variety either on muck or upland. It is not recommended for early spring planting in the open, as cool nights and cold ground tend to restrict its top growth.				

Radish continued next page

RADISH

1 ounce plants 100 feet of row; 10 pounds an acre

	1 oz.	¼ lb	1 lb	10 lb
Comet	\$.25	\$.40	\$ 1.15	\$ 1.10
25 days. Perfectly round, bright scarlet Radish averaging 1 inch across, with tender white flesh which remains solid for a long time. Ideal for home and market gardens and for both field culture and greenhouse forcing. Tops are short.				
Red Boy	\$.30	\$.50	\$ 1.35	\$ 1.25
22 days. Here is an outstanding new variety bred for high yielding ability and extremely short top; only 2" to 2½". In Cherry Belle class, new Red Boy is a uniform, dependable bulber that's ideally suited for high nitrogen soils. Round to globe shaped, crispy firm flesh.				
Special Scarlet Globe Medium Top ..	\$.20	\$.40	\$ 1.15	\$ 1.10
23 days. Especially desirable for use out-of-doors under normal growing conditions. A reselected stock of Scarlet Globe with medium tops and olive-shaped roots; color rich bright scarlet. Seed should only be planted in early spring or late fall if best results are to be expected				
Special Scarlet Globe Short Top ...	\$.20	\$.40	\$ 1.15	\$ 1.10
23 days. Tops small, ideal for bunching. Roots slightly elongated globe, 1¼ inches long when ideal for use, slender, well-defined tap root; uniform rich bright scarlet. Flesh white, crisp and of splendid quality.				
White Icicle	\$.20	\$.40	\$ 1.10	\$ 1.05
30 days. The attractive, straight roots grow about 5 inches long and ½ inch thick or larger, are very smooth and free from side roots. Skin is pure white, thin and tender; flesh is icy white, crisp and mild. Splendid for either spring or fall use.				

RAPE

Sow 10 pounds per acre Broadcast and five pounds in drills

	1 lb	50 lb	100 lb
Dwarf Essex	\$.45	\$.40	\$.35
An extra quick-growing green forage crop for use any time during fall, winter and spring. Rape can never become a pest, for it belongs to the same general family as the turnip and rutabaga and when planted under favorable conditions of soil and season, it makes an immense crop of green forage, juicy and succulent, and often at a time of year when little green feed is available.			

SORREL

	1 oz.	¼ lb.	1 lb.
Narrow Leaf	\$.60	\$ 1.75	\$ 5.00
60 days. Excellent in salads and as greens. Very often called "Sour Grass." Leaves are long, bright green with bitter sweet flavor. This is a perennial and will produce leaves for 3 or 4 years.			

SPINACH

1 ounce plants 100 feet of row; 9 pounds an acre

	1 lb	10 lb	25 lb	100 lb
America	\$.70	\$.65	\$.60	\$.55
47 days. This deep green, heavily crumpled new Spinach is not a quick-growing variety. Long after the other varieties are gone, it is still in perfect condition. Exceptionally good for late spring and summer. Excellent for freezing. It is the best kind for home use and outstanding for market. Plants are leafy and heavy. 6 to 8 inches high and 10 to 12 inches across.				
Dixie Market	\$.75	\$.70	\$.65	\$.60
45 days. Dixie Market was developed chiefly as a Fall and Winter variety. It is fast growing and high yielding with good resistance to blue mold and mosaic. Plant shiny dark green, compact, upright growing and can be machine harvested. Ideal for fresh market and prepackaging and can be used for freezing and canning.				

Spinach continued next page

SPINACH

1 ounce plants 100 feet of row; 9 pounds an acre

	1 lb	10 lb	25 lb	100 lb
Extra Dark Green Bloomsdale	\$.70	\$.65	\$.60	\$.55

40 days. A better and darker strain of the well-known, quick-growing reselected Bloomsdale. It ships well and retains its fresh appearance on the market. Heavily savoyed. Should be used for early spring planting; quick to go to seed.

Old Dominion	\$.70	\$.65	\$.60	\$.55
---------------------------	---------------	---------------	---------------	---------------

45 days. The finest of all blight-resistant Spinach. Most heavily savoyed, darkest green and slowest to bolt to seed in the spring. Used as a fall Spinach and also as a winter carry-over for early spring cutting. Our stock has been outstanding in all parts of the country.

Special Summer Savoy Long Standing	\$.70	\$.65	\$.60	\$.55
---	---------------	---------------	---------------	---------------

45 days. Resembles in general appearance a fine strain of Long Standing Bloomsdale, except that it is a shade darker and more savoyed. Will not go to seed as soon in the hot weather as other Spinach. Plants are large, uniform and compact.

Virginia Blight Resistant	\$.70	\$.65	\$.60	\$.55
--	---------------	---------------	---------------	---------------

38 days. Our strain is a true savoy adaptable for early fall planting, as it is a little quicker maturing than Old Dominion. For sections where mosaic is prevalent we recommend this highly desirable variety.

SQUASH

1 ounce of seed will plant 25 hills; 3 to 4 pounds an acre

	1 oz.	¼ lb	1 lb	10 lb
Caserta	\$.30	\$.85	\$ 2.50	\$ 2.40

50 days. Plants are bush type; 30 fruits to the plant are not unusual. The Squash are 6 to 7 inches long and 1 to 1½ inches thick at the market stage. This variety is of the Cocozelle type but it is earlier and more prolific.

Cocozelle Vegetable Marrow	\$.30	\$.85	\$ 2.50	\$ 2.40
---	---------------	---------------	----------------	----------------

60 days. Compact, upright plant; productive. Fruits are cylindrical, straight, smooth, dark green with lighter stripes; flesh very firm, greenish white. Very early.

Early Prolific Straightneck	\$.30	\$.85	\$ 2.50	\$ 2.40
--	---------------	---------------	----------------	----------------

54 days. Our strain of Early Prolific Straightneck is the finest northern-grown stock obtainable. An attractive and high yielding strain of Straightneck Squash with fruits creamy yellow, 8 to 10 inches long and 2 to 2½ inches in diameter, smooth, slender and slightly pear shaped.

Early White Bush Scallop	\$.30	\$.85	\$ 2.50	\$ 2.40
---------------------------------------	---------------	---------------	----------------	----------------

55 days. Creamy white with scalloped edges; flesh milk-white, smooth, firm and of delicious flavor. Plants of bush form, bearing a great crop.

Seneca Prolific Hybrid	\$.80	\$ 2.10	\$ 6.25	\$ 6.00
-------------------------------------	---------------	----------------	----------------	----------------

Entirely new and different, Seneca Hybrid is a first-generation cross by controlled pollination. Fruits are bright yellow and average 8 to 9 inches long, tapering only slightly at the neck. Similar to Early Prolific Straightneck but produces twice as many fruits from first two or three pickings.

Squash continued next page

SQUASH

Zucchini Hybrid \$.80 \$2.10 \$6.25 \$6.00

65 days. Like Cocozelle Vegetable Marrow but dark greenish black all over. Fruits 10 to 12 inches long by 3 to 3½ inches in diameter. Cylindrical, with square ends.

WINTER VARIETIES

1 ounce plants 10 hills; 3 to 4 pounds an acre

	1 oz.	¼ lb	1 lb	10 lb
Blue Hubbard Special	\$.70	\$1.90	\$5.50	\$5.25

110 days. Similar to the original type of Hubbard Squash except that the fruits are blue-gray and grow to enormous size. The flesh is thick, of deep yellow color and of fine flavor and texture. This Squash is a very profitable farm crop, as there is a great demand for these large fine Squash.

Boston Marrow Special \$.30 \$.85 \$2.50 \$2.25

97 days. Fruits are large, commonly 10 to 12 inches through, almost spherical; skin slightly roughened hard and brittle. The color both inside and outside is rich orange-red. The flesh is much thicker than other stocks of Boston Marrow. In and around Philadelphia, Boston Marrow Squash is referred to as "Pie Pumpkin." You should try some of our strain for at least a part of your crop this year. We know you will be satisfied.

Bush Table Queen \$.50 \$1.40 \$4.10 \$3.95

80 days. Fruits are similar in size and color to those of the Green Table Queen Vine variety. The flesh is of better quality. Plants are semi-bush growth, produce just as many fruits as the vine variety but takes less space in the field, so may be planted close. Excellent keeper.

Buttercup \$.50 \$1.40 \$4.00 \$3.75

105 days. Turban shaped fruits 4½ inches thick and 6½ inches across; weigh 4 to 5 pounds. Blossom end marked with a prominent "button." Skin is dark green, with silvery white stripes and spots of gray. Thick orange flesh, most pleasing rich flavor. Good keeper. Distinctly different shape.

Butternut \$.65 \$1.80 \$5.00 \$4.75

100 days. Fruits 10 to 12 inches long, with neck about 4 inches in diameter, which is solid flesh; the small seed cavity is located in the lower bowl-shaped end. Skin light creamy brown; flesh yellow, fine grained and of excellent quality. Also is a good keeper.

Improved Green Hubbard \$.35 \$1.00 \$2.85 \$2.60

105 days. The standard winter Squash for home, market garden and shipping. Fruits large, commonly 9 to 10 inches through, globular, dark bronze-green, moderately warted, rind very hard and strong; flesh very thick, deep orange-yellow, fine grained and dry, of splendid quality.

Large Table Queen \$.35 \$1.00 \$2.75 \$2.50

80 days. Extremely prolific; one of the most popular for home, market garden and shipping. Fruits pointed, acorn shaped, 5½ inches long and 4 inches through, uniform ridges; skin smooth, dark green; shell thin, flesh light yellow, bakes dry and sweet.

TOMATO

1 ounce produces about 1500 plants; ¼ pound an acre

	1 oz.	¼ lb	1 lb
Campbell No. 135	\$1.25	\$3.50	\$10.00
75 days. This variety has very large, uniform fruit that is crack resistant. The vine type is indeterminate or regular, somewhat more open than Rutgers but a fairly heavy vine. Campbell No. 135 is primarily a canning tomato and is not recommended for garden use. It has a hard woody core which makes it undesirable for eating purposes.			
Campbell No. 146	\$1.25	\$3.50	\$10.00
80 days. This variety is resistant to Fusarium Wilt and Tobacco Mosaic. The fruits are large but not as large as Campbell No. 135 and sets more fruits. This is a good garden tomato. Has good color and is fairly deep and globular in shape. The vine type is fairly heavy but somewhat more open than Rutgers.			
Garden State	\$.85	\$2.50	\$7.25
73 days. Developed by Campbell Soup Company. Plant vigorous, partly resistant to fusarium wilt and late blight; fruits slightly flattened globe shape, thick walled, very attractive in both size and color. They continue to hold their size and color until the end of the season.			
Marglobe Certified	\$1.00	\$2.75	\$8.00
75 days. We recommend this variety for use in sections infested with fusarium wilt and nail-head rust. Fruits uniform deep scarlet, large, uniformly globe shaped, smooth, solid and of distinct quality.			
Ontario	\$.85	\$2.50	\$7.25
75 days. A second early market and home garden variety. The fruits are large, deep, smooth and ripen to a full red color. The immature fruits have a distinctive yellowish green or "Apple" color.			
Rutgers Certified	\$1.00	\$2.75	\$8.00
84 days. At present Rutgers is one of the foremost market and canning varieties in the country. It is highly disease resistant and practically free from attacks of fusarium wilt. Plants are large and vigorous. Fruits average 6½ to 7½ ounces in weight, are globular, slightly flattened, having well rounded shoulders and a very small blossom-end scal. Color brilliant red.			
Stokesdale Certified	\$1.00	\$2.75	\$8.00
67 days. A second early scarlet variety maturing about a week earlier than Marglobe. Plant rather open in habit with medium heavy foliage. Fruits medium large, globe or semi-globe, smooth and well-colored.			
Trellis No. 22	\$2.75		
Fruit very firm, smooth, of very good color, slightly flattened in shape. Especially developed for use on trellis; four fruits make a pound. Demand for this tomato is increasing in markets outside the Boston area because of its very excellent shipping qualities.			
Trellis No. 32	\$5.00		
A few days later than No. 22, a little larger than No. 22, and doesn't need as much fertilizer. All other characteristics similar to Trellis No. 22. Used mostly in the New England states.			
Valiant	\$1.00	\$2.75	\$8.00
65 days. Very early. Adapted to short-season areas and the early market. Plant sparse and open; fruits are of fine quality for an early variety, globe shaped and of bright scarlet color. Does especially well in New Jersey.			

Tomato continued next page

TOMATO

1 ounce produces about 1500 plants; ¼ pound an acre

HYBRID TOMATO

	⅓ oz.	¼ oz.	½ oz.	1 oz.
Giant King	\$4.50	\$8.50	\$16.00	\$30.00

80 days. Colossal size tomato, very smooth, bright scarlet color, deep globe shape, thick walls and excellent quality flesh and flavor, firm and meaty. Vine large and vigorous with good coverage against sunburn. Foliage dark green.

	1 oz.	¼ lb	1 lb
Stokescross No. 4	\$5.00		

70 days. The compelling feature of this F2 hybrid is its ability to produce large, brilliant, smooth Tomatoes, ten days earlier than Rutgers. Tomatoes average 6 ounces, deep red in color and under normal weather conditions it will almost crack free, a factor probably due to its deeper root system.

TURNIP

1 ounce plants 300 feet of row; 1 pound an acre

	1 oz.	¼ lb	1 lb	10 lb
Extra Early White Milan	\$.20	\$.40	\$1.15	\$1.10

45 days. Roots 3 to 4 inches in diameter, very flat, with clear white skin and small tap root. Flesh snow-white, tender, sweet. Tops are 10 to 12 inches tall, medium green; strap leaved with small collar. Excellent early home garden and forcing type.

Purple Top White Globe	\$.20	\$.45	\$1.35	\$1.25
-------------------------------------	---------------	---------------	---------------	---------------

55 days. The leading Turnip — one of the best and the most popular. It serves for every purpose whether in the home or market garden or for shipping and storage. Tops medium large, dark green, erect, compact and used extensively for Turnip greens. Roots 2 to 4 inches in diameter, globe shaped, upper portion bright purplish red and pure white below; small tap root. Flesh white and tender.

Seven Top	\$.20	\$.40	\$1.15	\$1.10
------------------------	---------------	---------------	---------------	---------------

45 days. Extremely hardy foliage Turnip for table and forage use. Root woody and inedible; crown sends up numerous leafy shoots which are excellent for greens and for stock to graze on. Much grown for greens in the south.

RUTABAGA

1 ounce will plant 100 feet of row; 3 pounds an acre

	1 oz.	¼ lb	1 lb	10 lb
American Purple Top	\$.20	\$.45	\$1.25	\$1.15

90 days. An excellent variety for home or market garden and for shipping or storage. Roots are large, globular, small crowned, yellow in color with purple top; flesh tender, crisp and fine textured.

Bucks Co. Neckless	\$.35	\$1.00	\$3.00	
---------------------------------	---------------	---------------	---------------	--

85 days. This variety of Rutabaga is the famous Bucks County strain. The roots are globe shaped, with yellow skin and purple crown and practically neckless. Our seed of this variety is grown for us in Bucks County of Penna.

WATERMELON

1 ounce plants 25 to 30 hills; 4 to 5 pounds an acre

	1 oz.	¼ lb	1 lb
Black Diamond Certified	\$.50	\$1.25	\$3.50
85 days. The seed of this variety has been certified by and produced under the inspection bureau, Florida Department of Agriculture as provided in Florida Certification Seed law, and each bag has the state seal on it. The melons are dark green, nearly round, weighing 40 to 50 pounds. Seed large, mottled dark brown.			
Blacklee Wilt Resistant	\$.35	\$.90	\$2.50
85 days. New fusarium-wilt resistant variety with melons to Tom Watson type but somewhat thicker and shorter. Melons weigh 40 pounds or more, are long, dark green with a thin but firm rind, making it suitable for long-distance shipping. Flesh is rich red, finely grained, of good flavor and free from stringiness. Vines are very vigorous and most prolific. Seed black, medium size.			
Charleston Gray - Wilt Resistant	\$.35	\$1.10	\$3.25
85 days. Resistant to Anthracnose and Fusarium wilt. Developed for shipping but excellent for local market. Melons long blocky, with light gray green color. Rind hard, tough of medium thickness, stands shipment well. Meat is deep pink and delicious.			
Congo Certified	\$.40	\$1.10	\$3.25
90 days. Oblong, blocky, dark green melons faintly striped lighter green; flesh is bright red. Highly resistant to anthracnose. Weight 30 to 40 pounds. Good for home and market; tough rind makes it a good shipper.			
Dixie Queen Wilt Resistant	\$.30	\$.90	\$2.65
82 days. Similar to Dixie Queen except that is resistant to wilt. Large, almost round melons; skin is greenish ivory striped dark green. Dark red, fine-flavored flesh. An early variety. Our stock is desirably uniform and produces a large percentage of marketable melons. Seeds white.			
Kleckley No. 6	\$.25	\$.75	\$2.25
90 days. A new wilt-resistant melon. It is of the same type as Kleckley's Sweet with all of its fine qualities and size, to which wilt resistance has been added. To get maximum stands on infested soils delay thinning until small plants have grown past damage stage. Seeds creamy white with trace of brown.			
New Hampshire Midget	\$.35	\$1.10	\$3.25
60 days. This cantaloupe-sized Watermelon has enjoyed more popularity with home gardeners than any introduction in recent years. The New Hampshire Midget weighs about 3 pounds. Light green color, with bright red flesh and high sugar content.			
Sugar Baby	\$.50	\$1.50	\$4.00
75 days. A distinctive small sized variety of good quality, suited for bulk shipping and local market. Melons round, about 8 inches in diameter. Rind very dark green with indistinct darker stripes, thin, hard, tough. Flesh not excessively seedy. Seeds very small.			
Summit	\$.55	\$1.60	\$4.50
75 days. Earliness, quality and yield are featured in this new variety. Plants are very vigorous, producing numerous runners, which stem from a very extensive root system. The leaves are large, thick, and bright green color. Melons are oval and slightly oblong, with a smooth, bright green rind. Melons are of medium size, very uniform in shape and have a thick, tough rind. The flesh is bright red, fine textured, and very sweet. Summit has produced yields on heavily wilt infected soils ranging from 600 to 1000 marketable melons per acre, weighing 28 pounds or more each.
